

Outlook Email for Jira app is an extension of your email inbox, letting you intuitively access all relevant Jira features right from Microsoft Outlook.

Features

- Create and update Jira issues in Outlook, based on the content of your email.
- Apply attachments and text formats (like lists, colors and tables).
- Get intelligent suggestions for Jira issues based on the content and sender of the email.
- See all important information on issues (status, priority etc.) in a separate sidebar.
- See at a glance which emails have an issue assigned to them.
- Email issues to inform coworkers and customers.
- Instead of Jira notification emails, you get an overview of your relevant Jira action items sortable by the filters you know from Jira

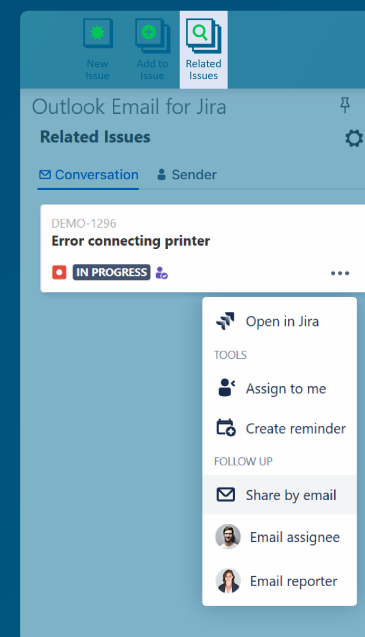

Benefits

For users

- Avoid gaps in Jira and email workflows
- Save time when handling your emails
- Easy to set-up and use without training.

For companies

- Increase adoption of Jira throughout your company:
 - Users are more likely to use Jira in the familiar Microsoft Outlook environment.
 - The Jira look and feel makes it easy to use the app without training.
- Don't worry about compatibility: The Outlook Email for Jira app works on all devices.

Server Pricing

10 users \$50	25 users \$600	50 users \$1,100	100 users \$2,000	250 users \$4,000	500 users \$6,000	2,000 users \$8,000	10,000 users \$10,000	10,000+ users \$12,000
